In reliance on this announcement via a Regulatory Information Service, this inside information is now considered in the public domain.

13 July 2026

SHAIRES HOLDINGS LTD**("Shaires Holdings Ltd", "Shaires" or the "Company")****Appointment of Directors and Senior Management**

Shaires Holdings Ltd (AIM: SHR) (formerly Jade Road Investments Limited), the London public company providing investors with exposure to leading private mid and late-stage technology companies, is pleased to announce the appointments of **Suhail Rizvi** as Executive Chairman, **Vivek ("Vick") Seth** as Chief Executive Officer and **Mr. Pishevar** as Vice Chairman and Non-Executive Director. The effective start date for Mr Rizvi is immediate, while for Mr. Pishevar it is the 21st of July 2026. The role of Chief Executive Officer is an executive management position and will constitute an appointment to the Board. Current Chairman, John Croft, will move into a Non-Executive Director role.

The appointments bring together three highly accomplished technology investors and capital markets professionals to the United States within a London public vehicle. Collectively, Rizvi, Seth and Pishevar have invested in numerous transactions with an aggregate value exceeding multiple billions and have backed many of the defining technology companies of the past two decades, including SpaceX, Facebook, Twitter, Uber, Airbnb and Snapchat, before those businesses entered the public markets. Their decision to bring that experience to a company listed on the Exchange's AIM market reflects the belief that the current generation of technology value is being created largely beyond the reach of public investors, and that London can become the public gateway to the opportunities in the technology sector.

Suhail Rizvi - Executive Chairman

Mr. Rizvi is the co-founder and Chief Investment Officer of Rizvi Traverse, a private investment firm. Over the past two decades, Rizvi Traverse has invested more than US\$3.5 billion across private companies in technology, media and entertainment sectors. Its portfolio has included investments in SpaceX, Facebook, Twitter, Airbnb, Sandbox AQ, Figure AI, Instacart, Planet Labs, SESAC, Playboy, International Creative Management and Entertainment. Mr. Rizvi served on the Executive Board of The Wharton School of Business at the University of Pennsylvania from October 2006 to October 2019, from where he holds a Bachelor of Science in Economics.

Vick Seth - Chief Executive Officer

Mr. Seth brings more than 35 years of corporate finance and capital markets experience and has managed transactions with an aggregate value exceeding US\$110 billion. He is the founder and Managing Partner of Pishevar Management, a private investment firm, and a Senior Partner and member of the Investment Committee of Shaires Holdings. Previously, Mr. Seth served as Vice Chairman of Investment Banking at Raymond James, where he built the firm's Real Estate Investment Banking Group into one of the industry's leading franchises. He is currently a Director and Head of the Group.

In addition to his advisory career, Mr. Seth is an active private investor, company builder and board member. Throughout his career, he has supported the formation, financing and growth of more than 30 companies, many of which have gone public through their transition to the public markets. This experience closely aligns with Shaires' investment strategy.

vision. Mr. Seth also serves as a director and adviser to several emerging growth companies. He holds a degree in Electrical Engineering from the University of Notre Dame.

Shervin Pishevar - Vice Chairman and Non-Executive Director

Mr. Pishevar is a serial entrepreneur, venture capitalist and technology investor with more than 20 years of experience in identifying and building category-defining technology companies. Throughout his career, he has invested in and founded technology businesses and has been recognised as one of the technology industry's leading early-stage investors. He was named to the Forbes Midas List of the world's top venture capital investors for four consecutive years.

Mr. Pishevar was co-founder and Managing Director of Sherpa Capital, a San Francisco-based venture capital firm that managed approximately US\$650 million across three funds and associated co-investment vehicles, with investments in Uber, Airbnb, SpaceX and IONQ. Previously, he was a Managing Director at Menlo Ventures, where he led investment in Uber's Series B financing and established its seed investment programme, which led to investments in Facebook and Snap. He also served as a board observer and strategic adviser to Uber. Mr. Pishevar co-founded Virgin Hyperloop One (later Virgin Hyperloop One), serving as its first Executive Chairman, and founded DP Quantum, a purpose acquisition company that took quantum computing pioneer D-Wave Quantum Inc. (NYSE: QW) public.

He currently invests through Sofreh Capital and Edison Companies. Sofreh Capital has invested in SpaceX and joined the Series B and joined the Board of Directors of Nova Sky Stories, founded by Kimbal Musk.

Mr. Pishevar was appointed by President Barack Obama to the J. William Fulbright Foreign Scholarship Board. He is a recipient of both the Ellis Island Medal of Honor and the Outstanding Americans by Choice Award.

Suhail Rizvi, Executive Chairman of Shaires, commented:

"I have spent more than twenty-five years investing in private technology companies and one lesson has stood out for me and that is much of the value creation in transformational technology companies occurs while companies are still private. Artificial intelligence, that trend is accelerating at an unprecedented pace, yet public market investors have limited access to these opportunities.

"Shaires has been created to bridge that gap. We are building a public, internally managed, permanent capital market with no management or performance fees, designed to provide both institutional and retail investors with access to a concentrated portfolio of the companies shaping the future of artificial intelligence. Our in-kind contributors include founders, employees and early investors to contribute private shareholdings in exchange for public shares. This provides access to investment opportunities that are often unavailable through traditional investment structures.

"Vick and Shervin are two of the most respected figures in technology investing and capital markets, and we have chosen to build this business through a public company on the London Stock Exchange's Main Market to support our ambitious plans for Shaires and believe we are well positioned to execute our long-term strategy.

"Today's announcement marks an important milestone in the Company's development, and we look forward to further updates on the execution of our strategy in the coming weeks."

Vick Seth, Chief Executive Officer of Shaires, commented:

"I have spent more than three decades in the capital markets, advising on transactions valued at over US\$1 billion. I have seen firsthand the challenge of giving public investors meaningful access to exceptional private companies. Shaires addresses that gap through a distinctive model that gives institutional and retail investors exposure to high-growth technology companies. Much of my career has focused on helping private businesses successfully transition to public markets, and I look forward to doing the same with our portfolio companies and, ultimately, with Shaires."

"We intend to operate Shaires with the discipline, transparency and governance expected of a public company. Our Board-approved valuation framework informed by recent funding rounds and observable secondary market data. Our initial portfolio will comprise approximately 10 to 15 private technology companies, with a particular focus on those leading or benefiting from the continued development and adoption of AI, alongside transparent reporting and governance."

"Shareholders can expect a regular cadence of portfolio updates, in-kind contribution announcements and financial reporting, beginning shortly. We look forward to demonstrating disciplined execution of our strategy to create long-term value for shareholders."

Shervin Pishevar, Vice Chairman and Non-Executive Director of Shaires, commented:

"For nearly three decades, I have partnered with founders at the earliest stages of transformational technology companies, from social networking and cloud computing to ride-sharing, fintech, quantum computing and now AI. Throughout, I have focused on sourcing, evaluating and supporting exceptional private growth companies to transition to the public markets, where the greatest value creation has historically occurred."

"Artificial intelligence represents the largest technology platform shift I have seen in my career. Yet the companies defining this new era are expected to remain private for longer than previous generations, creating a gap between where innovation is created and where public investors can participate."

"Shaires is designed to bridge that gap. By combining permanent capital, public market liquidity and exposure to selected private technology companies, we believe we can create a differentiated investment company that serves long-term shareholders and public investors while providing access to value creation that has historically been available only to a limited group of private investors."

"I am excited to work alongside Suhail, Vick and the Board to build a world-class public investment company that serves shareholders with access to the next generation of category-defining technology businesses."

The appointments complete the Company's senior leadership team ahead of its planned relaunch as Shaires. Shaires is well advanced in its preparations for its proposed capital raise and expects to announce further details in the coming weeks."

institutional placing and an accompanying retail offer in due course. Further announcements will be made.
